armed military guards at the gate and the doors of the radar installation southwest of Uzhgorod (N 48-40, E 22-18). Power for the installation was apparently furnished by mobile power units. the whining sound of generators and the sound of running truck motors inside the garages on several occasions.

Legend to sketch on page 3

1. Barbed wire fence: enclosing entire installation.
2. Wooded areas: at eastern end of installation.
3. Three garages: 10 meters long and 5 meters wide. Housed three van-type closed army trucks. Trucks were mobile generator units which supplied power for the radar station.
4. Three small antennas located outside of wire fence: 1 meter wide, 4 meters long, and 10 meters above ground surface. No lead-in wires were observed from these antennas.
5. Large wing of main building: one story, 15 meters wide, 60 meters long. Permanent type construction. [redacted]
6. Radar antenna: rake type, 6 meters long, 1½ meters wide (between rods). The antenna was seen in operation during the months of July and August 1952. Antenna operated through a 180 degree cycle and returned.
7. Small wing of main building: believed to house radar and radio operators. One window on west side and door on east side. [redacted]
8. Main gate: leading in from Minayska Highway.
9. Antenna lead: from radar antenna to small wing of the main building.
